MIAE 215 Midterm Review #1

Question #1

Write a program that:

a) Inputs two 5 element integer arrays, A1 and A2, from the keyboard.

b) If the arrays are equal (ie all the elements are equal) then print out “A1 and A2 are equal”, otherwise print “A1 and A2 are not equal”.

Hint: You can either check if all elements are equal or check if one element is not equal. Try both ways if you have time.

Question #2

What is the output of the following program ?

```
int i=9, j=4;

if( i == j ) {
        cout << "1\n";
} else if ( i/j < 2.1 ) {
        cout << "2\n";
} else if ( j/i < 1 ) {
        cout << "3\n";
} else {
        cout << "4\n";
        cout << "5\n";
}

int mycount , product = 2;
for( mycount = 3 ; mycount > 0 ; mycount-- ) {
        cout << mycount;
        if( mycount > 1 ) cout << " * ";
        product = product * mycount;
}
cout << " != " << product;
```
