OBJECTIVE

Industrial Engineering student at Concordia University with a Computer Engineering Technology diploma, combining hands-on technical skills with business and client-facing experience. Seeking opportunities to apply process optimization, data analysis, and engineering problem-solving in a collaborative, high-impact environment.

EDUCATION

Concordia University – Montreal, QC *BEng, Industrial Engineering* 2023 – 2027 (Expected)

Cégep Vanier – Saint-Laurent, QC *DEC Computer Engineering Technology* May 2023

SKILLS

Technical:

- Python, C, Bash, HTML/CSS, MicroPython
- IoT Systems, Cisco Packet Tracer, Wireshark
- Data Analysis & Process Optimization
- Autodesk Eagle & Inventor, 3D Modelling
- PCB Design (SMT & through-hole)
- Arduino, Raspberry Pi, ESP32
- Linux OS, Microsoft Office Suite

Professional:

- Project & BOM Management
- Client Relationship Management
- Web Design, SEO & Digital Marketing
- Graphic Design & Branding
- Strong Communication & Interpersonal Skills
- Autonomous & Effective Team Player

PROFESSIONAL EXPERIENCE

YS Marketing Solutions *Founder & Manager* July 2023 – Present

- Founded a digital marketing agency delivering web design, branding, and SEO for small businesses in Greater Montreal.
- Manage end-to-end project lifecycles from client acquisition through delivery and follow-up.

Sherwin-Williams *Sales Associate* May 2024 – Present

- Provide technical product advice to retail and commercial customers on paint, coatings, and equipment.
- Stepped into operational leadership within one month during a managerial vacancy.

R.S. Electronique Inc. *Intern* Jan 2023 – May 2023

- Performed assembly, testing, and QC of PCBs; managed BOM, component sourcing, and stencil processes.

Teleperformance *Customer Support Specialist* Feb 2021 – Aug 2021

- Delivered technical support via phone and live chat for telecom products, maintaining high satisfaction ratings.

PROJECTS

Cisco LAN Network Design Dec 2022

- Designed a multi-department local area network using Cisco Packet Tracer with proper IP subnetting.

Drawing Bot – ESP32 Robotics Fall 2022

- Built a drawing robot with ESP32, stepper/servo motors, and a custom-designed PCB; programmed in MicroPython.

Aquarium IoT Monitoring System Winter 2022

- Implemented real-time water monitoring (pH, temp, TDS) with Raspberry Pi 4 and ESP8266, displayed on Home Assistant.

CERTIFICATIONS & LANGUAGES

Introduction to Packet Tracer *Cisco — Licence & Certificate* March 2022

• French • English • Tamil
