

INDU211-2X - Introduction to Production and Manufacturing Systems

Department of Mechanical, Industrial and Aerospace Engineering

Term paper Description

Fall 2026

1. The Term Paper must be completed by a team of 4 to 6 students.
2. It is strongly suggested that the Term Paper is completed as a Team Work. In exceptional cases, if you believe that you can do a much better individual term paper, please contact the instructor for approval.
3. All teams are expected to work around the general topic suggested by the instructor.
4. The term paper should examine **the future of Industrial Engineering (IE) in the Generative AI (GenAI) era** by addressing the following topics, among others:
 - What are AI and GenAI, and how are they transforming the workplace?
 - Which areas of IE could potentially be fully or partially automated by AI?
 - What are the common errors and limitations of AI and GenAI platforms?
 - What will be the role of human Industrial Engineers in the GenAI era?
 - What skills should IE graduates develop to remain competitive in an AI-driven job market?
5. All team members of the same team will have the same term paper mark, assuming each team member contributes to the term paper equally, unless additional information is shared with the instructor.
6. While teams may use Generative AI tools to gather general background knowledge on their chosen topic, the preparation of the final report and content must be the students' own work and **Cannot** be generated by ChatGPT or similar AI platforms. The term paper must be based on published scientific articles and reports from reputable academic outlets, and all references must be properly cited in the final report. **Google Scholar** and **ScienceDirect** are appropriate platforms for locating such references.
7. Term Paper Group Proposal
 - Each team needs to submit a Term Paper Group Proposal of one page and include the Name of the team and all team members.
8. Video tape group presentation
 - Each team make a group presentation recorded in Zoom or other popular platforms
 - Each video tape presentation should last 15 minutes (to adjust by group sizes)
 - Every team member in a team should present a portion of the term paper.

9. Final Term Paper. Each team submit only ONE final term-paper of about 10 pages. The Paper should include the following sections:

- Abstract or Executive Summary
- Introduction
- Main content
- Conclusion
- References

10. Time Line:

- Each team submit ONE copy of its proposal by **Thursday, October 8, 2026 on Moodle.**
- Each team submit ONE copy of video tape presentation by **Thursday, Dec 1st, 2026 on Moodle.**
- Each team submit ONE copy of Final Project Report/Team Paper by **the date of the final exam on Moodle.**

Consult the instructor if you have any questions
