

Here is the lecture file:

https://drive.google.com/file/d/17v64MDBx6pDd5ZU9AMWX7jb_oX6i_B6g/view?usp=sharing

Please watch the lecture by the end of this week. I suggest watching part1_control_statements2.mp4 before part3_control_statements1.mp4 since those topics are a bit more important.

In the next two lectures we will solve numerous problems related to control statements, including topics covered in the lecture above. Therefore, it's important to get up to speed with control statements before then.

We will also be using a lot of control statement material in the upcoming Arduino labs (robots need control statements !).
